

## **Scanner Reports**

### **1. Individual Test Results Report.**

This report displays the raw score, percent correct, percentile, total correct for each student taking the test, and mastery information. It also shows the standard deviation, average score, median score, highest score, and lowest score; number of respondents, and number of test items.

### **2. Individual Item Response Report.**

This report displays the total score and actual test responses for each student taking the test. It also displays the number of respondents, average score, median score, high score, low score and standard deviation for the test group.

### **3. Item Analysis Report.**

This report analyses the group response to each item on the test. It displays the number of test items, number of responses in the upper and lower quarters and total population, total percentages of responses for each answer in question, and the discrimination index and difficulty factor for each response. It shows this information for each question in a selected subtest, or in the entire test. It also shows the Kuder Richardson 20 statistic for the test.
